

# Wireless Siren With Rechargeable Battery Backup

LoRaWAN™

R602B can be linked with any detection device such as fire, smoke, person detection, and so on. When any unexpected event occurs, the R602B will initiate an alarm to help you take immediate countermeasures.

## Where Can The Device Be Installed?

It can be installed in the indoor room, such as living room, and with the versatile sounds of R602B, users will be aware which event occurs.

## Mode Selection

R602B This device can emit sound and flash to remind people to pay attention to safety problems or detect emergency events.

**Fire Mode** : When a fire occurs, the alarm will ring after the smoke sensor is triggered.

**Burglar Alarm** : When there is a burglar and intrusion, the door and window sensor will be triggered and the bell will ring.

**Doorbell** : Installed at the door, it can be used as a doorbell to help you respond to visitors immediately.

**Emergency Mode** : If someone presses the emergency button, the device will be linked and an alarm will sound, allowing the user to respond to the situation immediately.

Linkage function requires Application server support

## Battery Backup

Use dual power supplies to upgrade reliability. In the event of a power outage, backup power is immediately activated to ensure continuous operation of the device.
