

# Multifunctional CO2 Detection Series

R718UBB Series

R718UBD Series

# What Harm Does CO2 Cause ?

In 2014, the World Health Organization pointed out that indoor and outdoor air pollution can cause damage to the respiratory tract, and is also closely related to cardiovascular disease and cancer.

Therefore, countries around the world are actively formulating relevant regulations.

When the indoor carbon dioxide concentration is too high, it will make people feel that the air is dirty, and even the organs will be affected.

Therefore, it becomes important to monitor the indoor air quality at any time.

# What Are The Hazards Of Particulate Matter?

The impact of PM on health is greater than that of any other pollutants, especially the small particle size of PM2.5, which can penetrate deep into the alveoli and interfere with gas exchange in the lungs.

# Multifunctional CO2 Detection Series

R718UBB / R718UBD series is a wireless communication device that can detect CO2 in the environment and can be combined with a variety of sensors.

	R718UBB	R718UBD
Power Supply	ER14505*2	DC 12V
CO2	✓	✓
Temperature and Humidity	✓	✓
Internal Vibration Sensor	✓	✓
Air Pressure	✓	✓
Light Sensor	✓	✓
TVOC	✗	✓
PM2.5 / PM10	✗	✓

## What Technical Support Do Netvox Provide?

- Netvox is an innovative company with a philosophy of sustainable development goals.
- We make a range of lot devices that collect environmental data, including air quality monitoring devices, so users can detect changes in air quality and take steps to avoid health impacts.
- Using this series of products can more accurately grasp data changes and update them at any time.
